- ⦿ Enhanced real-time reporting and charting capabilities
- ⦿ Manage security clearances
- ⦿ Data management conforming with data protection

Smart Integrated Global Site Management

We offer a range of services to meet the needs of our clients who range from small businesses in tiny industrial units to large public sector organisations. We work with our clients to make sure they are able to work efficiently and effectively in a safe environment making the best possible use of available technology within the budget available to them.

System Security

- Enhanced physical security to protect system hardware.
- Developed around the requirements of UK Government, AVM is the number one product for security and pass management.
- Hardened operating systems for increased security against cyber-attacks.
- FIPS 201 compliant 140-2 encryption.
- Windows authentication used to secure the application.
- Hardened SQL Server database communications
- AVM enforces secure encrypted communications, ensuring DATA integrity and security.
- All traffic between client and server is secured using netTCPBinding which uses Windows authentication and transport security.

Identiv Velocity Integration

- Supports all Digi-Trac commands
- Add/edit/delete Velocity users
- Execute Velocity reports
